

# Assignment: AWS IAM Management and Scripting

## Task 1: Create IAM Users and Groups

1. **Create IAM groups** for:
  - Developer
  - Quality Assurance
  - DevOps Administrator
2. **Create IAM users** and assign them to the appropriate groups.

## Task 2: AWS Shell Scripting

1. **Write a script** that:
  - Lists IAM users (`aws iam list-users`).
  - Lists IAM groups (`aws iam list-groups`).
2. **Output** the results to a file.

**AWS Services to Use:** EC2, S3, RDS.

## Evaluation Process:

You will be called randomly to the stage to demonstrate your assignment. Ensure your work is ready for presentation.
